ROOF SOLUTIONS

Alternative Roof Solutions

are specialists in low cost, energy efficient conservatory roof replacement, giving you back your perfect living space, regardless of the weather.

Replacement Conservatory Roofs by Alternative Roof Solutions

Is your conservatory too cold in the winter, too hot in the summer and too noisy when it rains?

At Alternative Roof Solutions we replace your polycarbonate or glass conservatory roof with a modern, solid conservatory roof.

It will allow you to use your conservatory all year round, due to the layers of insulation fitted within the roof, your conservatory will stay cooler in the summer and warmer in the winter, it will also stop the noise from rain.

Transform your conservatory into a room you can use all year round

Is your conservatory a wasted space that you can only enjoy a few days of the year? Or have you completely stopped using it for anything other than storage.

By replacing your conservatory roof with a solid conservatory roof, not only will it be usable all year round, it will greatly improve the look, turning your mostly unusable conservatory into a room that you can enjoy and be proud of.

Energy efficient conservatories

The installation that we install within our bespoke timber framed conservatory roof system reduces the level of heat transference. What this means is that the heat stays in your conservatory in the winter but in the summer, it keeps the heat out.

Also the lightweight tiles that we use also means that there is no noise from the rain and no glare from the sun, meanly that you will have a comfortable conservatory to enjoy all year round, not matter what the British weather throws at it.

Stunning interior conservatory space

When Alternative Roof Solutions replace a conservatory roof, we take as much pride in the internal finish as we do the external finish. All our solid conservatory roofs are finished with plasterboard and skimmed to a beautiful finish, we will also fit either LED down lights or your choice of light fittings to complement the look.

We can also fit a beautiful lighting pelmet to give that modern look. We can also fit Velux windows into your solid conservatory roof.

All conservatory roof replacements come with a 10 year insurance backed guarantee.

Have your conservatory windows and doors seen better days?

We're also on hand to replace them with brand new ones. All of our uPVC windows and doors are available in a wide range of colours meaning you can completely transform your conservatory from an unusable room into a beautiful extension to your home.

Building Regulations Certificate issued on completion of build.

Solid Conservatory Roof Benefits

Polycarbonate conservatory roofs have very poor insulation, especially if they are quite old. Which is why they are very difficult to keep warm in the winter and unbearable to use in the summer. Even glass conservatory roofs, which can have better insulation can get unbearably hot and difficult to keep warm.

Fitting one of our solid conservatory roofs with its three layers of insulation, means that in the winter, you will reduce your heating bills as the heat will be retained within your conservatory rather than escaping through the roof. Then in the summer the tiled conservatory roof will prevent the heat from the sun penetrating your conservatory, making it comfortable to use.

Added value to your home.

By installing a solid roof to your conservatory, this will add value to your home, as it more like a home extension than a conservatory.

Along with the many benefits of replacing your conservatory roof we are also able to replace your windows and doors with new energy efficient uPVC windows and doors. The internal conservatory ceiling is finished to a high standard, giving you an elegant finish to your new room.

Our skilled tradesmen will replace your conservatory roof in most cases within one week, to reduce the disruption to you and your home.

Conservatory too noisy?

Due to the timber framed construction of our replacement conservatory roofs and the tiles that we use, you will be able to use your conservatory no matter what the weather.

A conservatory you can use all year round.

Replacing the conservatory roof with one of our lightweight solid conservatory roofs, allows them to use their conservatory all year round in comfort.

Energy Efficiency

A solid conservatory roof has a lower U value than a conservatory with a polycarbonate or glass roof. Which means that you will reduce your heating costs to maintain a pleasant temperature in your conservatory

Lower maintenance costs

Unlike polycarbonate or glass conservatory roofs, a tiled conservatory roof does not need to be regularly cleaned for it to remain looking as good as when it was fitted.

Too much sun glare?

The glare through the roof of your conservatory can make it impossible to see the television screen or computer screen.

Solid conservatory roof = no sun glare from the conservatory roof.

Sun bleached conservatory furniture?

With a solid conservatory roof, as the sun cannot penetrate the conservatory roof, it will help protect the furniture in your conservatory from bleaching.
